ADVANCED BIOLOGICAL SOLID FORMULATIONS

**EVOGEN BIO-BRICK**

## EVOGEN BIO-BRICK

a unique bacterial-laden solid, combining a high bacterial count with slow release technology for use in degrading organic waste in grease traps

### overview

EVOGEN Bio-brick is a slow dissolve, bacterial-laden solid for use in degrading organic waste in grease traps and grease interceptors. The safe, application-specific bacteria are present in high numbers to handle difficult organic problems. The unique brick will dissolve gradually which allows for continuous treatment and degradation of waste. The naturally-occurring bacteria contained in the brick will reduce odour, sludge, fats, oils and grease build-up.

### advantages of EVOGEN BIO-BRICK

optimised proprietary bacterial consortium degrades a broader spectrum of substrates

effectively breaks down fat, oils and grease and thereby eliminates malodours at source

degrades high concentration of waste and enhances BOD/ COD/TSS removal

reduces sludge build-up helping to eliminate malodours such as hydrogen sulphide

eco-benign<sup>®</sup> formulation; contains no harsh chemicals

easy to install – no special equipment or labour required so highly cost effective

not dependent on people or equipment for dosing; performance benefits over manually dosed systems

continuous operation 24 hours per day, increases system efficiency

all strains are EEC Class 1. Product contains *Bacillus* bacteria in 100% spore form for extended product life

manufactured in accordance with recognised international quality standard ISO 9001

### applications

- grease traps
- grease interceptors
