EVOGEN EXTERIOR HARD SURFACE CLEANER

ADVANCED BIOLOGICAL LIQUID FORMULATIONS

EVOGEN EXTERIOR HARD SURFACE CLEANER

a unique liquid concentrate combining innovative eco-benign[®] chemistry and application-specific bacteria to offer an effective way of cleaning a wide variety of exterior surfaces

overview

EVOGEN Exterior Hard Surface Cleaner is an advanced, biologically-based cleaner. This unique formulation combines eco-benign[®] chemistry and application-specific *Bacillus* bacteria to offer an innovative way of cleaning a wide variety of floor surfaces.

Continued use of EVOGEN Exterior Hard Surface Cleaner in residential, institutional and industrial exterior cleaning applications provides a safe and efficient way of maintaining clean surfaces.

advantages of EVOGEN EXTERIOR HARD SURFACE CLEANER

superior fully formulated product with focus on high-performance cleaning and degreasing

optimised proprietary bacterial consortium degrades a broader spectrum of substrates

highly effective eco-benign[®] chemistry ensures immediate and effective cleaning

product continues to degrade organic matter by biological action post-cleaning

product prevents grease from resurfacing thus preventing dangerous, slippery floor conditions.

product bacteria provide additional advantage in terms of degradation of dirt within washing solution post application

readily biodegradable, low toxicity, eco-benign[®] components to minimise environmental impact

applications

- All types of floors and hard surfaces that are not damaged by water
- Concrete, stone and brick surfaces
- Removal of discoloration caused by algae and lichens
- Painted and coated aluminium and steel e.g. Exterior building cladding

modern bacteria-compatible chemistry for maximum product performance

long product shelf life both as supplied and post dilution

manufactured in accordance with recognised international standards, ISO 9001 and ISO 14001
